PITCH DECK HEADLINE REVIEW

Tidewater Analytics

Source: tidewater_seed_deck.pptx · 11 slides (9 main deck, 1 appendix, 1 hidden, not reviewed) · Reviewed 11 November 2026

Narrative assessment

The current titles name topics (Product, Traction, Team) rather than takeaways, so the story depends on the presenter. The recommended headlines carry the problem, product, early demand, forecast, and ask as one argument, while flagging the pilot-count conflict and the unevidenced team.

Recommended headlines

Appendix slides (1) are reviewed in the full analysis.

Slide	Current title	Recommended headline
1	Tidewater Analytics	**Tidewater Analytics helps municipal water utilities find leaks with clip-on acoustic sensors.**
2	The Problem	**Utilities lose an estimated 6 billion gallons of treated water daily, and most leaks surface only after damage.**
3	Product	**Clip-on hydrant sensors and a leak-detection model give repair crews a ranked leak list each morning.**
4	Traction	**A completed Marlow pilot and a signed Harbor County contract show early utility demand. †**
5	Business Model	**Per-sensor annual subscriptions of $1,200 are designed to create recurring utility revenue. †**
6	Financials	**Management forecasts revenue rising from a projected $0.4M in 2026 to $5.2M in FY2028.**
7	No identifiable title.	**A leak alerts dashboard ranks hydrant, main, and valve alerts by severity for each zone.**
8	Team	**Dana Ruiz leads as CEO and Sam Okafor as CTO; relevant experience is not yet shown. †**
9	The Ask	**A $3M seed round funds sales and product work toward 25 utility customers by Q4 2027.**

† Evidence in the deck is limited or conflicting; the headline is deliberately conservative. See the full review for the evidence gap.

Priority improvements

1. **Resolve the pilot leak-count conflict** — Slide 4 cites 14 leaks located; the appendix cites 12 confirmed by excavation. State one definition and one figure. (Slides 4, 11)
2. **Evidence the founders' relevant experience** — Add prior utility, sensing, or enterprise-sales roles so the team headline can make a supported claim. (Slide 8)
3. **Keep forecasts labelled as forecasts** — Retain “projected” and “E” labels in headlines and show the main forecast assumptions. (Slide 6)
4. **Add a competition slide** — Show how utilities find leaks today and why hydrant sensors compare favourably, using deck evidence. (Slides 2, 3)
5. **Title the dashboard slide** — Slide 7 is an image with no title; add a headline stating what crews gain from the dashboard. (Slide 7)

Findings are based solely on the content of the supplied deck (tidewater_seed_deck.pptx) and have not been independently verified; company claims are reported as stated. Recommended headlines are suggestions only; slide layouts were not edited or measured. Generated 11 November 2026 with Pitch Deck Headline Tuner.
