Tidewater Analytics

Acoustic leak detection for municipal water utilities

Seed round · 2026

The Problem

US utilities lose an estimated 6 billion gallons of treated water per day (industry estimate cited by the company)

Most leaks are found only after visible surface damage

Product

Clip-on acoustic sensors attach to existing fire hydrants

Repair crews receive a ranked leak list each morning

Traction

City of Marlow pilot (completed Mar 2026): 14 leaks located in 90 days

Harbor County: signed contract, $180K annual contract value

Financials

Forecast: $5.2M revenue in FY2028 (projected, not actual)

2026E $0.4M · 2027E $1.9M · 2028E $5.2M

Leak alerts dashboard

Zone 4 - hydrant 112 - high

Zone 2 - main 7B - medium

Zone 9 - valve 31 - low

Team

Dana Ruiz — CEO

Sam Okafor — CTO

The Ask

Raising a $3M seed round

Target: 25 utility customers by Q4 2027

Appendix: Pilot details

City of Marlow pilot: 12 leaks confirmed by excavation in 90 days
